—The ladies of the Episcopal Church will hold one of their pleasant socials at the Armory Hall Feb. 3. Dancing and refreshments. Admission 50 cents.

—It is Hale of Storey who is Chairman of the Committee on Education and not McDonnell as previously reported in the papers. He fills the bill, too.

—Ayer's Sarsaparilla wonderfully improves the complexion, and brings to old and young the bloom of health. As a purifier of the blood it has no equal.

—The railroad company have commenced hauling rock from Rock Point, between Belleville and Candelaria, to the Mount Diablo works at Sodaville for the new mill.

—Let it be positively understood that Schneider & Simas, the photographers opposite the Mint, are the artists selected to make the official State group for 1887.

—Recently in a game of cribbage, a citizen of Candelaria played five hands which averaged twenty-four points to the hand; or twice around the crib-board, 120 points, in five hands.

—Fourteen of the 76 United States Senators chew tobacco, and 58 use it in one form or another, while of the 325 members of the House, only a few wholly abstain from the weed.

—Senator Fair's dissipated offspring who, although not much beyond his teens, is already blase, blazed away at ex-Congressman Page the other day in a Chicago restaurant. The old man would never have made a break like that so long as he could have hired it done.

—The Chronicle heads a London dispatch announcing the defeat of Goschen "The Irish vote too much for Goschen." As the individual was badly snowed under we should say the Irish didn't vote enough for Goschen. The necessity of a writer on the Chronicle who can write plain English is becoming more apparent every day.

After receiving the Senate messages the House adjourned.

Indian Polygamists.

Among the Montana Blackfeet Indians polygamy is still rife, although the redskins are beginning to abandon it—that is to say, the Indians take no more plural wives. In buffalo times—when more squaws meant more buffalo robes tanned in a given time—was the palmy days of polygamy among these Indians. Now, however, they find that more than one wife is a burden, and are not inclined to increase the number.

Sport at the Track.

In the pigeon match Furlong and Hamilton tied on twenty birds and in shooting off the tie Hamilton won.

In the sweepstake for \$100 Ed. Harris, Dean Hatch and J. Morgan tied. Harris won the tie. The shooting was uniformly good and the sport very enjoyable. More matches are announced for next Sunday.

A MUSICAL BILK.

George L. De Prans at his old Tricks.

Some months ago the APPEAL noted that George L. De Prans, a thief and confidence operator, had skipped out of this city after bilking quite a number of people. Several of his friends were quite annoyed at the APPEAL and took the editor severely to task. Yesterday the APPEAL received the following postal card:

\$25 REWARD.

George L. De Prans is wanted for grand larceny. He is a piano and organ tuner. He is of medium dark complexion, about 5 feet 9 or 10 inches high, about 45 years old, claims to be of English birth. Stole a horse and buggy on the 17th day of the present month, from Rough and Ready, to wit: A sorrel mare, white stripe in face, two hind feet white, branded J. S. on right side of neck, about 900 pounds weight; an open buggy, with heavy wheels, dashboard—wheels and shafts are new; also robe or blanket, striped gray, red, blue and green. The above reward will be paid for the apprehension of the thief and the capture of the property. Arrest and telegraph.

GEORGE LORD,

Sheriff Nevada County.

About a month ago the editor of the APPEAL, hearing that De Prans was in Grass Valley, wrote an open letter to the Tidings over his signature and requested its publication in the hopes that a showing up of this rascal's record might save other parties from being swindled. The Tidings did not publish the letter probably thinking that De Prans was too good a man to be guilty of swindling. The non-publication of the letter enabled De Prans to steal a horse and buggy which he otherwise would not have received a loan of.

Irrigation Near Carson.

The following letter from a gentleman of experience in matters relating to irrigation, explains itself:

FRANKTOWN, January 29, 1887.

To Hon. Wells Drury:—In compliance with your request on my introduction to you on the 26th, for me to give you my ideas on storing water for irrigating and other purposes in the vicinity of Carson, I will say that in looking over the books you gave me I find in one of them, viz: The report of the Surveyor General and State Land Register for the years 1885-86. J. D. Kersey, Assessor for Ormsby county, on page 46, has so well explained the advantages arising from making artificial lakes, that it leaves but one more advantage that I can think of that would arise from the same. An ice crop could be gathered from these lakes, being high up in the mountains. Ice forms in November. I was talking to Doc. Benton about the ice business, stating that Mr. Price, of Washoe valley always has ice because he can get it every season up in the mountains.

There is a little valley West of Washoe valley, also a valley on Clear Creek, where the old Driesbach flume runs. Good perpendicular rocks at the outlet of the valley, can be seen on the grade going to Lake Tahoe. It lies in the direction of Swift Station. The dams required for safety, should be on the same principle as the Marlett Lake dam, with a good overflow outlet. I believe sufficient water could be caught on Clear Creek to irrigate all the land from the State Prison to Carson Valley, and the little valley lake could irrigate the ranches that have no water, at the South end of Washoe Valley; then take it to the East side of Washoe Lake, or Lake View, to the North of Carson City, or it may be enough for both place.

There is the rock at each place, waiting to be used. \$100,000 spent for labor and cement would be a start in the right direction, causing an increase in population and taxable property, benefiting trade, State and Government.

I have not the least doubt as to there being many places to be found where water can be stored and used to work mills and come in for irrigating purposes afterwards, as explained more fully in Mr. Kersey's report.

Very respectfully,
I. J. ABRAHAM.
